

HIV/AIDS Research Pioneer Dr. Judy Mikovits Blows Whistle on Dr. Fauci

forbiddenknowledge.net/hiv-aids-research-pioneer-dr-judy-mikovits-blows-whistle-on-dr-fauci

This video was produced by Robert F Kennedy Jr's Children's Health Defense coalition to allow top US research scientist, Dr. Judy Mikovits to briefly tell her story.

Mikovits worked extensively under Anthony Fauci for decades, who she says stole her proprietary research not once, but twice.

She joined NIH in 1980 as a Postdoctoral Scholar in Molecular Virology at the National Cancer Institute, where she collaborated with Dr Frank Ruscetti and helped him isolate the HIV virus and its link to AIDS. Her boss at NIH, Fauci delayed publication of their paper for 6 months to let his protégé Robert Gallo replicate, publish and take credit for their discovery.

The delay allowed AIDS to spread around the globe, which in turn helped Fauci get promoted in 1984 to Director of the National Institute of Allergy and Infectious Diseases, where he remains to this day.

In 2006, Dr Mikovits became director of Whittemore Peterson Institute for Neuro-Immune Disease, collaborating again with Dr Ruscetti to search for the cause of Chronic Fatigue Syndrome (CFS). **She discovered that 67% of women with CFS carried a virus —called Xenotropic Murine Leukemia-Related Virus (XMRV), which only appeared in 4% of healthy women.**

XMRV is associated with prostate, breast, ovarian cancers, leukemia, and multiple myeloma. Many women with XMRV have given birth to children with autism. Mikovits and Ruscetti published their findings in 2009.

Other researchers had previously linked the first CFS outbreak to an experimental polio vaccine given to doctors and nurses that resulted in a 1934 outbreak among Los Angeles County hospital staff. **That polio vaccine was cultivated on pulverized mouse brains. Dr Mikovits' studies suggested that the highly-infectious XMRV virus was present in the MMR and Polio vaccines given to American children and the Japanese Encephalitis vaccines given to US military personnel.**

In 2011, their research strongly indicated that XMRV had entered the human virome through a contaminated blood supply and vaccines. Mikovits says, "We recognized that this mouse retrovirus was causing an alarming national health crisis. That is, if the blood supply and the vaccines were heavily-contaminated with mouse viruses of many strains."

Before she could warn the public, Fauci used his power to silence her. She says, "What Tony Fauci, Ian Lipkin, Harold Varmus did was pressure me to be silent and to withdraw our manuscript."

When she refused,"Dr Fauci stepped in and ordered that my computers and notebooks be confiscated. And he orchestrated the retraction of our science paper. He then removed all my funding and prevented me from getting a job in government research from 2012 forward."

Hundreds of millions of Americans may have received vaccines contaminated with XMRV. Judy's latest book, was released on April 14, 2020.
